DETAILED ACTION

Claims 1-35 are pending in this application.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 21, 22, 33 and 34, drawn to method of treating emphysema with 13-*cis*-retinoic acid, classified in class 514, subclass 725.
- II. Claims 11-20, 23 and 35, drawn to pharmaceutical composition comprising 13-*cis*-retinoic acid and a pharmaceutically acceptable carrier, classified in class 514, subclass 725.
- III. Claims 24-30, drawn to treating emphysema and related disorders with 13-*cis*-retinoic acid, classified in class 514, subclass 725.
- IV. Claims 31 and 32, drawn to treating emphysema with 13-*cis*-retinoic acid with one or more additional therapies, classified in class 514, subclass 725.

The inventions are distinct, each from the other because:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions group I is a method of treating emphysema alone; group III is a method of treating emphysema and related disorders; group IV is a method of treating emphysema with the use of additional therapies and group II is drawn to a pharmaceutical composition.

Art Unit: 1616

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Election of Species

If the applicant chooses group III and election of species is required.

Claim 27-29 are generic to a plurality of disclosed patentably distinct species comprising, for example nebulizer device, aerosol device or electrohydrodynamic aerosol device. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the elected group, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Upon the election of a single disclosed species (e.g., Example 5, page 15-17), a generic concept inclusive of the elected species will be identified by the Examiner for examination along with the elected species. Moreover, whatever, specific compound is ultimately elected; Applicant's are required to list all claims readable thereon.

Art Unit: 1616

Papers related to this application may be submitted to group 1600 by facsimile transmission. Papers should be faxed to group 1600 fax machine at (703) 308-4556. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30; November 15, 1989.

Conclusion

Claims 1-35 are under election/restriction requirement.
